Introduction

I always loved computers since I was little: knowing how things work under the hood, find out how to use them and for what... have always been things that have fascinated me. So when I had the opportunity to study something related with the field, I didn't hesitate and I opted for learning my passion. I also learn new things on my own to expand my knowledge. I love learning new things and leave a job well done

Education

Superior technician in Multi-platform Application Development
IES San Andrés   2023-2025

Technician in Micro-computer systems and networks
IES San Andrés   2021-2023
